

# Roots

Emeli Sandé

If the wind takes new direction  
I know we'll find our way  
The past will always guide us  
It's never gonna fade  
The future keeps evolving  
That's just nature's game  
Time will bring its changes  
But our roots, they will remain

Daughters turn to mothers  
Set sailing to unknown  
But no matter what the distance  
This will always be their home  
Generations gather  
Passing down the flame  
Time will bring its changes  
But our roots, they will remain  
Our roots, they will remain

Our roots are in the soil  
They're in the fields, the rivers and the streams  
And if you dig in deep enough  
You'll find strength and centuries  
The voices whisper through the hills  
Songs about our legacy  
Make sure you listen carefully, my friend

There is no tomorrow  
Without yesterday  
History's within us  
It's in our DNA  
Hope's on the horizon  
The future calls our name  
Time will bring its changes  
But our roots, they will remain

Our roots, they will remain  
Our roots, they will remain
