Moments

Emerson Drive

I was coming to the end of a long long walk When a man crawled out of a cardboard box Under the E. Street Bridge Followed me on to it I went out halfway across With that homeless shadow tagging along So I dug for some change Wouldn't need it anyway He took it lookin' just a bit ashamed He said, You know, I haven't always been this way

I've had my moments, days in the sun Moments I was second to none Moments when I knew I did what I thought I couldn't do Like that plane ride coming home from the war That summer my son was born And memories like a coat so warm A cold wind can't get through Lookin' at me now you might not know it But I've had my moments

I stood there tryin' to find my nerve Wondering if a single soul on Earth Would care at all Miss me when I'm gone That old man just kept hanging around Lookin' at me, lookin' down I think he recognized That look in my eyes Standing with him there I felt ashamed I said, You know, I haven't always felt this way

I've had my moments, days in the sun Moments I was second to none Moments when I knew I did what I thought I couldn't do Like the day I walked away from the wine For a woman who became my wife And a love that, when it was right, Could always see me through Lookin' at me now you might not know it But I've had my moments

I know somewhere 'round a trashcan fire tonight That old man tells his story one more time He says

I've had my moments, days in the sun Moments I was second to none Moments when I knew I did what I thought I couldn't do Like that cool night on the E. Street Bridge When a young man almost ended it I was right there, wasn't scared a bit And I helped to pull him through Lookin' at me now you might not know it Oh, lookin' at me now you might not know it But I've had my moments Tištěno z pisnicky-akordy.cz Sponzor: www.srovn
