## So Far to Fall

## **Emerson, Lake & Palmer**

I was "Master Faster", I was "Mr. Mystery" There wasn't a mortal man was gonna make a monkey out of me. I had reflex, action, first strike capability So high - so tall - so far to fall.

I took my time, my life was all without a cause Till she came bursting through the frontdoor of my heart, Just like the signs that say I'll follow by a star, Once more, no blame, I'm far, no name .

Too much, too soon, a touch of moon A burst balloon, so far, so far to fall. Ooh she had me, she had me running rings around the floor. She had me nailed to a door, she had me crying out, She had me crying out for more, more, more, more, more, more, more. She bad me, she tied me up in knots like a piece of a string, She did a thing to my thing, she did a thing to my thing Like it's never been done before.

Too much ...

I saw stars, in the night, I was hers, I was high I had so far to fall, such a long way to fall And I fell and I fell and I fell -----

So if you're "Master Blaster" or you're "Mr. Mystery" Don't think you're insulated from love's electricity. There'll be no escape for you, there was no escape for me So high - so tall - one night you're bound to fall.
