

## Be Cool

Emery

Hey be cool man  
Everyone here's a little tipsy  
Unclench your fist and  
Let's get ourselves a drink

Halfway in the scene  
The circles you'd been running  
In your head, in your head  
Not even second best

Be cool man  
Don't run your mouth in here again  
You will find the end  
Bliss is hollow

Her words kept you both there  
Like cement in your bones  
A teenage dream is hard to wake from  
When the weight keeps creeping up

Stare ahead, pretend  
Let this all end or begin  
Flirt with anxiety but try not to let it in

Pray a taste will calm you down Somewhere on the outskirts of this town  
Early nights can make you drown  
The screen can hide what you have found

The lips of lovers find their way to another  
Your voice forgets how to make a sound

But not like this  
Nothing like this

Fill your lungs  
(Get your feet on the floor)  
With a secret  
(Just 50ft from the door)  
Your mother  
(You parked a little ways)  
Kept herself  
(Down the street)  
When you find  
(Your pockets are full)  
Hiding places  
(To march your thoughts)  
And habits  
(So make your plans)  
You don't really need anyone else  
You'll never get caught

But I saw her eyes catch mine

Slow it down! Don't lose control

Find your car keys  
Get up and drag yourself out of this place

So be cool man, just be cool man  
Be cool
