

I've Got Forever

Emily Ann Roberts

I've got forever to never stop loving you

Wanted to give you the time of day
First time I saw you
Before you even said your name
Somehow I already knew
Every kiss I'd ever saved, I was about to use

Could have talked all through the night
And through the next one too
Betcha saw how I couldn't
Take my eyes off of your eyes of blue
If I could have found a ladder, faster
Would have been standing up there on the roof
Yellin', "I know it's true"

I've got forever to never stop loving you
A fever every time you walk in the room
Oh, it's madness, the way you make Mercury move
I've got forever to never stop loving you

I'm counting my heart beats
Just like a rich man counts his money
I'm walking down the street
Like I'm the queen bee of the honey
I feel happy, I feel shaken
Like I know there's no mistaking
Almost too good to believe

That I've got forever to never stop loving you
A fever every time you walk in the room
Oh, it's madness, the way you make Mercury move
I've got forever to never stop loving you

I've got forever
A fever every time
You walk in the room
Oh, it's madness, the way you make Mercury move
I've got forever

I've got forever to never stop loving you
A fever every time you walk in the room
Oh, it's madness, the way you make Mercury move
I've got forever to never stop love...
Loving you
Loving you
