

# Mind Games

Emma Bale

I'm not even healed  
I don't even know  
There's something right here  
It's starting to show  
I just want you near  
But boy, you're so cold  
Did you forget  
It's both our faults

Cause it takes two of us  
To sabotage everything and ruin us  
Don't know how to feel about losin' us  
Thought there was an us in trust

But you  
Take my mind, take my mind off your mind games  
When you're here I can't escape  
You take my mind, take my mind off your mind games  
I forget what I should say  
You turn the lights off, turn my mind off  
You make me wanna cross that line  
You take my mind, take my mind off your mind games  
Off your mind games, off your mind games

Now that you're gone  
End of the world  
Boundaries up  
I see it clear  
You let her in  
I was naive  
Said I was wrong  
I just agreed

But it took two of us  
Why was it so hard just to root for us  
To put your temptation on mute for us  
Now there's only us in lust

But you take my mind, take my mind off your mind games  
When you're here I can't escape  
You take my mind, take my mind off your mind games  
I forget what I should say  
You turn the lights off, turn my mind off  
You make me wanna cross that line  
You take my mind, take my mind off your mind games  
Off your mind games, off your mind games

I know that it's over, but I can't get over  
Pull me in closer I'm ready for closure  
I should say it's over, but I can't control it  
I should say it's over, you know that it's over  
I know that it's over, but I can't get over  
Pull me in closer I'm ready for closure  
I should say it's over, but I can't control it  
I should say it's over, you know that it's over  
I know that it's over

But you take my mind, take my mind off your mind games  
When you're here I can't escape  
You take my mind, take my mind off your mind games  
I forget what I should say  
You turn the lights off, turn my mind off  
You make me wanna cross that line  
You take my mind, take my mind off your mind games  
Off your mind games, off your mind games

Take my mind, take my mind off your mind games  
Off your mind games, off your mind games
