

Worth It

Emma Bale

I'm running through the dark, scared of every single spark for so long
Feel like I was never me and my body couldn't breathe for too long
Getting ready for our breakdown, we've lost some precious time now
But as soon as we hit the town, no gravity can hold us down

It's what you do, do, do

Awakened by the sun when our hearts collide
Running to the fire, lighting up the sky
Cause even if we lose well we have tonight
It was worth it
It was worth it
We can take the fall cause we felt the heights
Breaking through the walls cause we've seen the other side
And even if we lose well we have tonight
It was worth it
It was worth it
All the time

Flowers bursting out their buds
So the water turns to floods, let's go on
Saved by the heat of the heart
As melted ice fell through the dawn, it's all done

It's what you do, do

Awakened by the sun, when our hearts collide
Running to the fire, lighting up the sky
Cause even if we lose well we have tonight
It was worth it
It was worth it
We can take the fall cause we felt the heights
Breaking through the walls cause we've seen the other side
And even if we lose well we have tonight
It was worth it
It was worth it
All the time
It was worth it
It was worth it
All the time

Fast, hold onto something
Fast, something you know will last
Hold onto something

Awakened by the sun, when our hearts collide
Running to the fire, lighting up the sky
Cause even if we lose well we have tonight
It was worth it
It was worth it
We can take the fall cause we felt the heights
Breaking through the walls cause we've seen the other side
And even if we lose well we have tonight
It was worth it
It was worth it
All the time
It was worth it

It was worth it
All the time
It was worth it
It was worth it
All the time
