

I was only seventeen back then  
With a reckless heart  
I remember running like the wind  
To be where you are

And we'd fall through the shadows  
Weightless in the dark  
Take me down that road sometime again  
Under winter stars  
I wanna stay here

And we're dancing  
And the look is in your eyes  
I could fly  
With your hands on me  
We can't stand still tonight  
We collide

I could taste the night-time on your skin  
As we'd spin around  
I didn't know how high I was back then  
But I do now  
I wanna stay here

And we're dancing  
And the look is in your eyes  
I could fly  
With your hands on me  
We can't stand still tonight  
We collide

Take me out of here  
Take me out of here  
Take me out of here tonight now  
You make it feel better  
You make it feel better

And we're dancing  
And the look is in your eyes  
I could fly  
With your hands on me  
We can't stand still tonight  
We collide

Take me out of here  
Take me out of here  
Take me out of here tonight now  
You make it feel better  
You make it feel better
