

Hold back the night from us
Cherish the light for us
Don't let the shadows hold back the dawn

Cold city lights glowing
The traffic of life is flowing
Out over the rivers and on into dark

I'm going down town where there's music
I'm going where voices fill the air
Maybe there's someone waiting for me
With a smile and a flower in her hair
I'm going down town where there's people
The loneliness hangs in the air
With no-one there real waiting for me
No smile, no flower nowhere

Cold city lights glowing
The traffic of life is flowing
Out over the rivers and on into dark

Hold back the night from us
Cherish the light for us
Don't let the shadows hold back the dawn

I'm going down town where there's music
I'm going where voices fill the air
Maybe there's someone waiting for me
With a smile and a flower in her hair
I'm going down town where there's people
My loneliness hangs in the air
With no one there real waiting for me
No smile, no flower nowhere

I'm going down town where there's people
My loneliness hangs in the air
With no one there real waiting for me
No smile, no flower nowhere

Hold back the night
