

# Starlight

## Empire Cast

When there is smoke, there is a fire  
Burning my heart up  
If they only know, you're my desire (That's me)  
The world would put an end to us (What you do baby?)

I'll ride in the night on the back of your bike  
With my hands, my hands to the sky  
So fast, we can fly, let's leave it behind (Leave it behind)  
So alive, I ain't scared anymore (Hands up)

Hand in hand we run, hiding from the sun (The sun)  
Under your starlight (Starlight)  
'Til the break of day, my body should stay (Should stay)  
Under your starlight (Starlight)

Oh, you wanna get away, brace yourself, full throttle  
Well gassed just to get the brakes  
Grip your waist and you shake like a figure 8  
Let me get a taste for infinity like the length of space  
Tell the haters get away, you're a fight here  
I'm a have your hand proddy for a light year  
I got a Lyon pride, baby, get it quite clear  
I'm a shot of top shelf stash, not a light beer  
So tell them buds get wiser, wild up, burn brighter  
'Cause me and you are solar  
We make a big bang shine like a Supernova  
Create a whole new world, influence culture  
Yeah, I'm a king and you a queen  
Tiana, Hakeem, they can call us Takeem  
And the biggest power couple ever on the scene  
Yeah we reign supreme

Hand in hand we run, hiding from the sun (Yeah)  
Under your starlight (Starlight) (It bright)  
'Til the break of day, my body should stay (Should stay)  
Under your starlight (Starlight) (Come here baby)  
Under starlight  
Let the light come down  
Let's ride  
Ride out, right now  
Fast life  
And we won't slow down  
Tonight

Under starlight  
Let the light come down  
So bright

Fast life  
And we won't slow down
