

Why Not

Empire Cast

OK, crown got my name on it
Bow to the royal prince
Started in this game and right now I'm gonna finish it
Down but not limited
Pain is my benefit
When you take a lion out the jungle this is what you get
RAH!

Come and ride with the mob yeah
You better get up on your job yeah
All that cappin' gotta do it from the side yeah
Make sure you don't cross the line when I slide yeah

I been bent but I'm unbroken
I got some regrets but I know where I'm going
Cause in the end, its never the end
You know I'll get up and still come back for more

I put it on the line
Every dollar every dime
Why not
I made it through the fire
Came out on the other side
Shout out to my enemies
No this ain't the end of me
Keep that same energy
Wonder why I'm winning
Why not

Stop it no you can't stop it you know we poppin',
Option no other option we gotta pop this

Pretty girls in my lamb and they lapping it up
Light skinned, dark skinned no I don't give a what

We be getting money yeah you already know
We butting in the work and we're now we're running the show,
When we move, there ain't nothing that we can't do
And you can't break us

It's a celebration
Come and join the conversation
Yeah you know the reputation
So baby don't ever play yourself

I been bent but I'm unbroken
Got some regrets but I know where I'm going
Cause in the end, its never the end
You know I'll get up and still come back for more

I put it on the line
Every dollar every dime
Why not
I made it through the fire
Came out on the other side
Shout out to my enemies
No this ain't the end of me

Keep that same energy
Wonder why I'm winning
Why not

Stop it no you can't stop it you know we poppin'
Option no other option we gotta pop this

All this time
I thought falling was breaking but I was mistaken
I did that
Out of the ashes a star in the making
I'm thriving I'm steady surviving while all ya'll just getting by
No need to fake it to make it cause the money never lies

Stop it no you can't stop it you know we poppin'
Options no other options we gotta pop this
