

## To Her Door

Empire of the Sun

Wait, it's the morning  
The night, never stayed  
And there's so much going on inside my head  
Wait, do you recall  
Just what happened  
Can't I come around and talk to you

I feel better when we are together  
I know it's simple but I don't care  
I tried to say the things to make up for the mess I've caused

Take this journey  
Don't reject me  
I'll do whatever you ask of me  
Heart beats in time  
Power to streetlights  
Eyes like I've never seen so beautiful

I feel better when we are together  
I know it's simple but I don't care  
I tried to say the things to make up for the mess I've caused

I feel better when we are together  
I know it's simple but I don't care  
I tried to say the things to make up for the mess I've caused  
I feel better when we are together  
I know it's simple but I don't care  
I tried to say the things to make up for the mess I've caused
