

I heard a shot outside my door
I think it's hardly something I should explore
My ears are ringing and my eyes are wide
I start begging for mercy
I ain't ready to go

When nobody knows you, nobody cares
and nobody see's you, cause you're not really there

You got me where you want me come and get me come on
You got me where you want me I surrender come on
You got me where you want me come and get me come on,
come on
Surrender

I'm outside I think I'm alone
I got no pockets got no cellular phone
I hear a whisper, is it my ghost?
I start begging for mercy, I ain't ready to go
I ain't ready to go

When nobody knows you, nobody cares
and nobody see's you, cause you're not really there

You got me where you want me come and get me come on
You got me where you want me I surrender come on
You got me where you want me come and get me come on,
come on
Surrender

You got me where you want me come and get me come on
[repeat]

You're not really there
Nobody see's ya, nobody see's ya, nobody see's ya

You got me where you want me come and get me come on
You got me where you want me I surrender come on
You got me where you want me come and get me come on,
come on
Surrender
