

## Voodooized

Empires

Help me, I'm in trouble  
My body feels just like a double  
I don't know whats happened to me  
Fire, oh fire  
I'm pretty sure I've burned my desire  
I think someone voodooized me

But if you call, I'll come you  
If you call, I'll come you

Where? Honey, where?  
You better show up soon to be fair. If you put on more needle i  
n me...  
Pull out my soul and put it in your mouth to be full  
Puncture after punctures like its blown

If you call, I'll come to you  
If you call, I'll come to you  
I'm no burden, I'm yours to use  
But if you call, I'll come to you

Oh, we can dance, we can dance till the morning shines it all a  
way  
We can dance, we can dance down to nothing  
You can play your voodoo in the evening  
Lipstick on a shadow you keep leaving  
Novocaine and laughter till were seething  
We can start out loving like its breathing

Come get me if your heart is a bad thing  
Come get me if your heart is a bad, bad thing

If you call, I'll come to you  
Well if you call, I'll come to you
