

## Just The Same

Empress Of

Something about your body makes me feel so safe  
I want you on top of me like a paperweight  
Don't be too busy for me, its a Saturday  
I like to give you a hard time, hope that's okay, (hope that's okay)  
I memorize your voice and every single phrase  
We never grew out of that "too much PDA"

The genesis of all this started in the rain  
I hope it grows into a forest, just the same  
Just the same  
Say something  
Say you see me  
Like I see you  
If you believe me  
I'll believe you  
Just the same

Whisper something to me, make my heart beat race  
I can't concentrate with your arms round my waist  
Forget your other obligations, it can wait  
I like to be your main priority, this place  
We learned all about each other it took one day  
I know most everything you love and hate

The genesis of all this started in the rain  
I hope it grows into a forest just the same, just the same  
Say something  
Say you see me  
Like I see you  
If you believe me  
I'll believe you

Try to count each star in the sky  
If you're gonna ask me how much I  
Love you, its the same  
Just the same  
Just the same  
Just the same  
Just the same  
Just the same  
Just the same  
Just the same  
Just the same  
Just the same  
Just the same  
Just the same  
Just the same

Try to count each star in the sky  
If you're gonna ask me how much I  
Love you, its the same  
Just the same

Say something  
Say you see me (just the same)  
Like I see you (just the same)  
If you believe me (just the same)  
I'll believe you

Try to count each star in the sky  
If you're gonna ask me how much I  
Love you, its the same  
Just the same  
Just the same  
Just the same  
Just the same  
Love you, its the same  
Just the same  
Just the same  
Just the same
