

U Give It Up

Empress Of

Something happens in my body
It remembers all your grooves
I feel myself self-destructing
In a softness I might lose

It's shocking to tell you how much I still notice
I can't be the poison in all this
There's something about how it ended in nothing
You give, you give, you give, you give it up

Before its time
You've got another question on your mind
You give it up
You've got no voice
When something bites
You pull back scared to fight
You give it up

Felt your face and heard your laughter
It has power over me
Reminiscent reverie
I wish was reality

It's shocking to tell you how much I still notice
I can't be the poison in all this
There's something about how it ended in nothing
You give, you give, you give, you give it up

Before its time
You've got another question on your mind
You give it up
You've got no voice
When something bites
You pull back scared to fight
You give it up

Life is not easy
Being a woman is not easy
Woman can be misinterpreted
But you make yourself the woman you want to be
Love is the language of the heart
The language that everybody can understand

You give, you give, you give, you give it up
Before its time
You've got another question on your mind
You give it up
You've got no voice
When something bites
You pull back scared to fight
You give it up
Before its time
You've got another question on your mind
You give it up
You've got no voice
When something bites
You pull back scared to fight

You give it up
