

Always There

Empty Tremor

Darkest night
wondering if I'm blind
long shades
towering down over me
so cold
is this black void where I am
I have lost
all the ways I've seen 'til today
your face
seems the only thing to believe
oh please
our shelter is still over there, my friend
Take me to that place
where we've always been before
ain't got time to wait
tell me what's the way and
I'll be always
I'll be always there
I feel my old friend
your fear
thousand of tears falling down there
I have found that is our time
to get back again
'cos our dreams
we've made now are lost in the sky
One man is asking for an open door
one child has found the key he's looking for
they still walk on the same way, my friend
Take me to that place
where we've always been before
ain't got time to wait
tell me what's the way and
I'll be always
I'll be always there
Ain't got time to wait
tell me what's the way and
I'll be always
I'll be always there
