

Dead City Lights

End of Green

Down with the city lights
Burning hearts with grief
So many times I crawled on this way
There's a pain in sight
Everyone's insane
Same old town and nothing remains
Damn the city lights
Burning all you freaks so many times I walked on this way
You're all insane
You can never hide the pain tonight
Fellows on my side, together we will feed on their blood
Fuck this place up
Damn those city lights
All the hearts we break, all the moments we fake, the deadline
will be our enemy
Now the mourning awakes, all the souls that we take the dayligh
t will be our enemy
