

I Get Lonely

Engelbert Humperdinck

When I'm alone in my room
I'm thinking only of you
And the darkness closes in
I light a candle to see
Just a reflection of me
And the emptiness rages within

Every time that you leave me standing
All alone in my own little world
Your sweet smiling face always lingers
Leave me wanting you more and more and more

At night when it's late I get lonely
At night when it's late I get blue
Tonight there's no light in my window, no no no
Tonight there's no love without you

Remember the first time when we
Started to make a thing of it
I can't believe what you were saying to me
Let's make it happen baby
We got a lot of love to share
Give it a chance, give it to me
So come on back tonight

Tonight it's late and I'm lonely
Tonight there's no stars in my sky
Tonight oh I need tender lovin' oh yeah
C'mon babe say alright I'm with you

Remember the first time when we
Started to make a thing of it
I can't believe what you were saying to me
Let's make it happen baby
We got a lot of love to share
Give it a chance, give it to me
So come on back tonight

Tonight when it's late I get lonely
At night when it's late I get blue
Tonight there's no light in my window, no no no
