

Just for the Love of You

Engelbert Humperdinck

If you're alone
Although we're apart
Don't be afraid to admit that you're lonely
Just pick up the phone
And talk to my heart
Tell me you want me, and I will be there

Just for the love of you I would travel through the jungle
Just for the love of you I would travel to a star
No mountain is too high, I just know that I need to find you
To be where you are, the end of the earth would not be too far

How could you go
And leave me behind
Knowing my life would be empty without you
I want you to know
If you change your mind
Call me and tell me, and I will be there

Just for the love of you I would travel through the jungle
Just for the love of you I would travel to a star
No mountain is too high, I just know that I need to find you
To be where you are, the end of the earth would not be too far

Just for the love of you I would travel through the jungle
Just for the love of you I would travel to a star
No mountain is too high, I just know that I need to find you
To be where you are, the end of the earth would not be too far

Just for the love of you I would travel through the jungle
Just for the love of you I would travel to a star
No mountain is too high, I just know that I need to find you...
