

Love Is the Reason

Engelbert Humperdinck

Meeting you, was like finding a life long friend
I recognized my self in you, how could I pretend
Love saved a place, here in your warm embrace
We know that we were meant to be, we blend so perfectly

And love is the reason, I long to be with you
Love is the reason we feel the way we do
We found our season and we've just begun
Two hearts together as one

Meeting you, was like knowing where I belong
Now I'm sure my love's secure right here in your arms
Love made it clear, we're destined to be here
So we could find a love designed to last throughout the years

And love is the reason, I long to be with you
Love is the reason we feel the way we do
We found our season and we've just begun
Two hearts together as one

And love is the reason, I long to be with you
Love is the reason we feel the way we do
We found our season and we've just begun
Two hearts together as one
Two hearts together
Two hearts together
As one
