

I wish I was a comet  
Burning up into the night  
I wish I was a comet  
But I'm just a satellite

I don't like the limelight  
So we don't hold hands in daylight  
I still drag the closet  
All my limbs, they ache inside  
And surely all my family and my friends  
My god and my ends  
They cannot all be wrong  
So I play along:

We refrain from touch  
We are satellites (La la la la la la)  
In a cosmic dance  
Amongst the northern lights (La la la la la la)  
And we orbit fast  
But I wish we could collide  
I'm sick of concealing  
I'm sick of the feeling  
I no longer want to hide

Cos I think it could be love  
(Yeah I think it could be love)  
But I can't show you enough  
(But I can't show you enough)  
I wanna burn through the atmosphere  
Soar like a meteor tonight  
Cos I think it could be love  
(Yeah I think it could be love)  
But I can't show you enough  
(But I can't show you enough)  
I wanna burn through the atmosphere  
Soar like a meteor tonight

All the gravity between us  
Someone bring me down to land  
And write a prayer to Venus  
What is life without affection

We refrain from touch  
We are satellites (La la la la la la)  
In a cosmic dance  
Amongst the northern lights (La la la la la la)  
And we orbit fast  
But I wish we could collide  
I'm sick of concealing  
I'm sick of the feeling  
I no longer want to hide

Cos I think it could be love  
(Yeah I think it could be love)  
But I can't show you enough  
(But I can't show you enough)  
I wanna burn through the atmosphere

Soar like a meteor tonight

Now online they discuss  
Whether I exist  
And in the court they decide  
Who I can kiss  
Now online they discuss  
Whether I exist  
And in the court they decide  
Who I can kiss

Cos I think it could be love  
(Yeah I think it could be love)
