

# Into Eternal Fire

## Entrails

Doomsday are closing in  
Fire pits burn the skin  
Burning the fools called man  
The hatred has just begun

(Chorus)

Try to stand up straight  
But the grave is your faith  
The pile of death grows higher  
You're thrown into eternal fire

On your knees or you will bleed  
All in act, demonic deeds  
On your souls, I will feed  
Pain and hell, I will bring

(Pre-chorus)

Breathless they lie, the weakened fools  
Injured by blade into doom  
Gladly I put the humans in the ground  
Into eternal fire you're thrown

Death will rule, blood covered Earth  
Bodies will burn in a pile of flesh  
All will die, no ones left  
Doomsday arrive, I bring death

(Pre-chorus)

Breathless they lie, the weakened fools  
Injured by blade into doom  
Gladly I put the humans in the ground  
Into eternal fire you're thrown

All is gone the Earth is burned  
Your life is done, forever gone  
No one breathes I destroyed your lies  
The world inferno was brought to life

(Chorus)

Try to stand up straight  
But the grave is your faith  
The pile of death grows higher  
You're thrown into eternal fire
