

Come Home To Me

Eric Benét

Girl I'm trying hard just to understand
Where did I go wrong & I been I'm a good man
You could say your wish & I make it come true
It's not a damn thing i wouldn't do for you
I think you how much this is killing me
But i love you enough to set you free
Go ahead baby. Find yourself
But just do my heart a favour girl. Don't Find nobody else.

When you walk the world the whole way around
And the best you had you already found
And your heart had enough of breaking down
And darling you'll know where I'll be
Come home to me
I'm not saying your not the one for me
It's just something inside I've been questioning
Cos every woman has to go and find her own path
And if our love was true like we always knew then I'll be coming back

When I walked the world the whole way around
And the best I've had I've already found
When the heart has had enough of breaking down

And darling you'll know where I'll be
Come home to me
Now while your on your way think of how this all began
Before lovers we were friends
That's no ordinary thing

I'm gonna put my trust in love
So love put your trust in you

When I walked the world the whole way around
And the best I've had I've already found
When the heart has had enough of breaking down

My darling you'll know where I'll be

When I walked the world the whole way around

And the very best you've had you've already found

When the heart has had enough of breaking down

My darling you'll know where I'll be
Come home to me

I'm coming home

Come home to me

I'm com in on home

Come on back home
