

## India

Eric Benét

I got the biggest part of heaven in my life  
And I can feel it every time I see your eyes  
You're my world, you're my light  
India

If I could, you know I'd open every door  
But your own journey makes it mean so much more  
I believe in all your dreams  
India

Down, you'll never let me down  
When you follow your own way  
Speak the words only you would say

Keep reaching for your star  
It won't be far  
When love's behind you

You're the miracle of life that love has made  
This bond between the two of us will never break  
Your flower blooms, I sing for you  
India

You hold the universe inside your little hands  
So don't you listen if they just don't understand you  
When you try, you always fly  
India  
Yes, baby

Keep reaching for your star  
If won't be far  
I'm right behind you  
You, yeah

I got the biggest part of heaven in my life  
And I can feel it every time I see your eyes  
You're my world, you're my light  
India

I believe in all your dreams  
India  
When you try, you always fly  
India, yes, you do, baby
