

Heart Attack

Eric Burdon

She's such a thriller, the number one killer in town
She'll make love to you, she'll turn your world upside down
Just when you think you've gone and reached the end
You're overblown and your heart stops again
She's captured your soul
The little girl's got control of your mind, yeah

She's a heart attack, attack
She's coming back
Steal your whole heart away
Heart attack, attack, she's a cardiac
She's the one who makes you pay

Such a sweet sickness that woman is so wicked and wild
She looks like an angel
But she's got the soul of a dark devil child
Just when you think you've gone and passed the test
You'll be screaming cardiac unrest
When the devil is your lover
There's no way to recover your heart, no baby, no

She's a heart attack, attack

She's coming back
Steal your whole heart away
Heart attack, attack, she's a cardiac
She's the one who makes you pay

Because the devil's always got a way, yeah

When you think you've gone and reached the end
You're overblown and your heart stops again
She's captured your soul
The little girl's got control of your mind, yeah

She's a heart attack, attack
She's coming back
Steal your whole heart away
Heart attack, attack, she's a cardiac
She's the one who makes you pay

Heart attack, heart attack
Heart attack, heart attack, heart attack
Heart attack, heart attack, heart attack
Heart attack, heart attack, attack
Heart attack, heart attack, heart attack
Heart attack, heart attack, heart attack
