

# Yes, I Am Experienced

Eric Burdon

For him it's a simple movement

As easy as making love

And he makes love to the sky and the moon

Yes he does

For some its only confusion

And that's those who don't know where they're going

And for those who never heard or seen the truth

Their blind

For some it's a haze of color

Like a bright exotic bird in flight

And for those who wish to fly with it, fly with it, try with it, fly, fly, o  
hhhh fly with it, fly

He's amazed at \_\_\_\_\_ sound

That have been filtered through his mind

He's filtered out all the good things and the bad things have been left way  
behind, far behind

For those of another generation

He's all but to make fun of

But they do not understand the experience, the experience, the experience, t  
he experience, the experience, the experience, the experience, the experienc  
e, the experience

Have you ever been experienced

You know what I am talking about, Jimi

Come here baby

You ever ever been really experienced

Does your mommy know that you are big and \_\_\_\_\_

Don't you know that you should be in bed

Well have you ever been experienced, experienced, experienced, experienced,  
experienced, experienced, experienced, experienced, experienced, experienced,  
, experienced, experienced, experienced, yeah ahhh
