

Forever

Eric Hutchinson

Stars in flight
Forever tonight
Forever tonight

Burns so bright
Forever tonight
Forever tonight

Tell me how you know how you know how you know
Tell me how you know how you know how you know
That nothing lasts forever
That nothing lasts forever
Tell me how you know how you know how you know
Tell me how you know how you know how you know
That its to late
Because my heart won't wait, forever

Sun comes up lure alone lure alone
Sun that loves
Forever in alone
Forever alone

Tell me how you know how you know how you know
Tell me how you know how you know how you know
That nothing lasts forever
That nothing lasts forever
Tell me how you know how you know how you know
Tell me how you know how you know how you know
That its to late
Because my heart won't wait, forever

Constellations above me
Where did you go
Where did you go

Hold on if you still love me
How will I know
How will I know

Tell me how you know how you know how you know
Tell me how you know how you know how you know
That nothing last forever
That nothing lasts forever
Tell me how you know how you know how you know
Tell me how you know how you now how you know
That its to late my heart wont wait, forever
Stars in flight forever tonight forever tonight
