

new religion

Eric Hutchinson

Get yourself a new religion
I don't wanna be your God no more
Get yourself some new traditions
It's not like it used to be before
You're shedding blood in my name
Spreading lies and shortcuts
Pulling families apart, deciding who and what
So get yourself a new religion
And quit brewing in mine

Get yourself a new religion
I don't be the one you blame
Get yourself a new condition
Stop wearing out my goddamn name
You send [?] on your side
Send the [?] down
When you're back up on top
You set fire to the town
So get yourself a new religion
And quit brewing in mine

You're doing it wrong
You're doing it wrong
You need me so bad
I know you [?]
You know too
I'm the best you've ever had

I gave you air you can breathe
I gave you midnight and dawn
I gave you language and love
I gave you space and beyond

So get yourself a new religion
Quit brewing in mine

I bet there's other books
I bet there's other faiths
Go give 'em your dirty looks
Go give 'em your [?]
Get yourself a new religion
And quit brewing in mine
So get yourself a new religion
And quit brewing in mine
