

Different Folks

Eric Johnson

Was a time
We all were here
We shared the same dream
It seemed so clear

Side by side
We'd be through life
But plans of your days
Changed in the night

Who'd of thought
You wouldn't stay
Chase your dreams
Just another day
But destiny her wings would rapture you

Best of times
We sure did share
It's given to me
That I was there

Company
[?]
No time in mid air
To question why

Here for now
But not for long
Soon to be
Just a separate song

But notes entwined define their rhymes sometimes

Different folks
They go away
Where they go
I can't say
But hey....

In my heart they'll always stay
We go on
[?]
They're travelling through
The Milky Way

Blast of life
We can't forget
The comet's trail
We all did set

Different folks
Gone from here
Where they go
It's just not clear
But hey....

In my life they'll always be

Different folks
With love set free
They're gone from you
They're gone from me
I struggle to see....

That's the way it's supposed to be
