

# Come Through

Eric Nam

I'm kinda buzzin now  
I'm thinkin bout you at a couple rounds  
Mmm I look around  
Thinkin you'll be here any second now

My heart is open any moment  
You can walk in this room  
It's in slow motion that door opens  
And I'm lookin for you  
I know we'll feel it  
We can make it like it's only us two  
Just me and you

So won't you come through  
Come through, come through  
I've been looking for you  
Whoever you are  
I'll know that it's you  
It's you, it's you  
I know you'll come through

I'm kinda stumblin now  
Liquid courage got me thinkin out loud  
Wait am I hallucinating?  
I need you now to come and save me

My heart is open any moment  
You could walk in this room  
It's in slow motion that door opens  
And I'm lookin for you  
I know we'll feel it  
We can make it like it's only us two  
Just me and you

So won't you come through  
Come through, come through  
I've been looking for you  
Whoever you are  
I'll know that it's you  
It's you, it's you  
I know you'll come through

So won't you come through  
Come through, come through  
I've been looking for you  
Whoever you are  
I'll know that it's you  
It's you, it's you  
I know you'll come through

I need you to come through  
I need you to come through  
I need whoever you are

I need you to come through  
I need you to come through  
I need whoever you are

So won't you come through  
Come through, come through  
I've been looking for you  
Whoever you are  
I'll know that it's you  
It's you, it's you  
I know you'll come through

So won't you come through  
Come through, come through  
I've been looking for you  
Whoever you are  
I'll know that it's you  
It's you, it's you  
I know you'll come through
