

Best Friends

Eric Paslay

I already met your momma
You've been to where I'm from
We know each other's secrets
And deserted island songs
When my heart gets broke, you're my first call
'Cause you know what to say
When the sky begins to fall
You pull me out of the rain

When best friends fall in love, what should they do?
Should they dance across the razor that could cut their hearts in two
?
When best friends fall in love, where do they go?
Oh, to pour out the truth that the world already knows
Time must say "It took you long enough"
When best friends fall in love, yeah

You can't fight the feeling
Can't hide it anymore
When you've already found
What you've been lookin' for
It's dangerous, but worth the risk
Go on, close your eyes
Let those words fall off your lips
And catch you by surprise

When best friends fall in love, what should they do?
Should they dance across the razor that could cut their hearts in two
?
When best friends fall in love, where do they go?
Oh, to pour out the truth that the world already knows
Time must say "It took you long enough"
When best friends fall in love, oh yeah

I already met your momma
You've been to where I'm from
We know each other's secrets
And where our hearts belong

When best friends fall in love, what should they do?
Should they dance across the razor that could cut their hearts in two
?
When best friends fall in love, where do they go?
Oh, to pour out the truth that the world already knows
Time must say "It took you long enough"
Life forever changes with one touch
When best friends fall in love, yeah
When best friends fall in love, oh yeah
