

# Fingertips

Eric Paslay

So many dreams to reach for  
So many stars up in the sky  
So many hearts to break yours  
My oh my

So many stories waitin'  
For you to make your way to them  
How you choose to tell em  
Well, the pen is in your hand

Baby don't be afraid to chase the great unknown  
Between love and god and me you'll never be out there alone  
The greatest power that you hold is to not forget  
You got the whole wide world there at your fingertips  
Yeah you got the whole wide world there at your fingertips  
Oh, keep believing, yeah, keep believing

I can't wait to see you flying  
Can't wait to watch you learn to land  
Don't let 'em get you second guessin'  
If you can

Find your truth and turn it up  
Let that doubt turn into dust  
When the road is hard and the odds are stacked  
I'll be right here when you look back

Baby don't be afraid to chase the great unknown  
Between love and god and me you'll never be out there alone  
The greatest power that you hold is to not forget  
You got the whole wide world there at your fingertips  
Yeah you got the whole wide world there at your fingertips  
Oh, keep believing, yeah, keep believing

Let your faith be a child in a radio flyer  
Let the light in your heart set the darkness on fire

Baby don't be afraid to chase the great unknown  
Between love and god and me you'll never be out there alone  
The greatest power that you hold is to not forget  
You got the whole wide world there at your fingertips  
Yeah you got the whole wide world there at your fingertips  
Oh, keep believing, yeah, keep believing

Let your faith be a child in a radio flyer  
Let the light in your heart set the darkness on fire
