

# Fadead

Eric Reprid

Let the feelings fade and numb the pain with someone new who isn't you  
Let the feelings fade and numb the pain, fuck around 'till you come through

Talk about you all the time to myself now  
I can't tell 'em you the person that they ask about  
Used to sit in silence thinking with my eyes low  
Call me over with a look mix you up with my iPhone caught me in a higher zone  
These nights be a shame if you stay alone  
And karma be a bitch who just wanna bone  
I can't even go to bed when the weekend close  
Guessin' how this shit feels you ain't even close  
I just need my notes  
You just need to boast  
This the last time I'm sipping just to try to cope  
Cause it don't fucking work  
When I'm faded shit I do just gon' make it worse

Let the feelings fade and numb the pain with someone new who isn't you  
Let the feelings fade and numb the pain, fuck around 'till you come through

Let the feelings fade and numb the pain with someone new who isn't you  
Let the feelings fade and numb the pain, fuck around 'till you come through

I ain't got no pass time  
Too much on the line to ever let this shit pass  
I be steady chasing peaks 'till I flat-line  
Too much on my mind when it be stuck up on the past  
It just cycles through the last time  
Stick to routine and keep tryna act fine  
Takin' L's oh well, still get mine  
Don't believe in all the hype over bad signs  
I ain't going back down just watch what we gon' do  
Always wanting these people who don't want you  
Only family who cares and it's tattoo  
Always finding myself feelin' bashful  
The confidence never did come natural  
Staying too passive  
Yeah  
I wonder how they grass is  
Yeah  
I be losin' traction  
So I'ma just

Let the feelings fade and numb the pain with someone new who isn't you  
Let the feelings fade and numb the pain, fuck around 'till you come through

Let the feelings fade and numb the pain with someone new who isn't you  
Let the feelings fade, numb the pain, with someone new who isn't you  
Let the feelings fade, numb the pain, numb the pain, numb the pain  
Feelings fade, numb the pain, someone new
