Colors

Eric Saade

I need adrenaline to cover all my sins
Back to be crazy, back to be crazy
I'm living carelessly like I'm seventeen
Do what I wanna, be who I wanna

Round and round we fly
Raise your glass and toast this life
Bring it to the top and up we go
We're higher than the sun

It's spinning round like one million pills in my mind
I can feel my dreams slowly coming to life
Take another sip from this trip, drink it up
I need to recover from black and white to colors

Let's just stay there and leave the rest and said
No need to stress it, there's no need to stress it
So let us freeze the time to feel forever young
And enjoy all the madness, enjoy all the madness

Round and round we fly
Raise your glass and toast this life
Bring it to the top and up we go
We're higher than the sun

It's spinning round like one million pills in my mind
I can feel my dreams slowly coming to life
Take another sip from this trip, drink it up
I need to recover from black and white to colors

I'm living carelessly like I'm seventeen
Do what I wanna

It's spinning round like one million pills in my mind
I can feel my dreams slowly coming to life
Take another sip from this trip, drink it up
I need to recover from black and white to colors

It's spinning round like one million pills in my mind
So move a little closer, we're wasting no time
Take another sip from this trip, drink it up
I need to recover from black and white to colors

Black and white to colors, to colors
