

Cover Girl part II

Eric Saade

Girl so tight and I love sci-fi, yeah
The way you walk, I learn to watch your every step
The way you talk, make it hard to breathe
The way you sing, when you're in bed and you're undressed
No wedding ring, leave it to the dream

She's a knock-out ten point model
And they all talk about her
Genie in a bottle, found all my wishes with this girl
Something about you I can't resist
Say the word, and I'll take the lead

The way you look, I ain't never seen before
You rock my world, cover girl
And you're above all the girls I've ever known
You rock my world, cover girl

Girl so tight and I love sci-fi
Gotta be science fiction
Girl so tight and I love sci-fi, yeah
Gotta be science fiction

The way you smile, I just forget about the rest
And when you're out, you're always surrounded
The way I'm falling, it makes me think that I am obsessed
A dirty mind you let me talk about it

She's a knock-out ten point model
And they all talk about her
Genie in a bottle, found all my wishes with this girl
Something about you I can't resist
Say the words, and I'll

The way you look, I ain't never seen before
You rock my world, cover girl
And you're above all the girls I've ever known
You rock my world, cover girl

Something so unreal, this girl got sex appeal
And I don't need to feel science fiction
And girl I must confess, I love special effects
So we should get undressed, science fiction

Girl so tight and I love sci-fi, yeah
Girl so tight and I love sci-fi, yeah

The way you look, I ain't never seen before
You rock my world, cover girl
And you're above all the girls I've ever known
You rock my world, cover girl

The way you look, I ain't never seen before
You rock my world, cover girl
And you're above all the girls I've ever known
You rock my world, cover girl

Girl so tight and I love sci-fi

Gotta be science fiction
Girl so tight and I love sci-fi, yeah
Gotta be science fiction
