

Won't play with you, yeah, I would rather play dead
I'm only here to get inside of your head
I'm showing up, tryna pray for some buzzin'
Looks like I'm there, but the truth is I wasn't
I'd run from the rubble, hide from the flame
Show the world we're in trouble and change my name

A disaster's what you're makin'
Different outcome, we can change it
Ever after, make arrangements
So I lie here on the pavement

A disaster's what you're makin'
Different outcome, we can change it
Ever after, make arrangements
So I lie here on the pavement

Traded all my friends for enemies
Showing me emotion isn't help to me
Don't think that it's empathy
Fixing me is gonna need a remedy

I crossed the line
Again
And it's not the time
To defend

A disaster's what you're makin'
Different outcome, we can change it
Ever after, make arrangements
So I lie here on the pavement

A disaster's what you're makin'
Different outcome, we can change it
Ever after, make arrangements
So I lie here on the pavement
