

DISTRESS

ericdoa

(I love you Mochila)

On your lips, still cigarettes
Heart is beating out my chest
And my name stay on your tongue
Talk to me like you're obsessed
Tryna show me I ain't new
Cause you think that I'm impressed
I'm just calling out forever
Trying to plug out my distress
On your lips, still cigarettes
Heart is beating out my chest
And my name stay on your tongue
Talk to me like you're obsessed
Tryna show me I ain't new
Cause you think that I'm impressed
I'm just calling out forever
Trying to plug out my distress

And all this liquor in my body
Gonna go right to my liver
I know when you see me happy
You persist and turn to bitter
Wanna see me in the ground
Body broken up and withered
Know I said this shit before
But I'm a loser not a winner
You say that you heaven sent
But I know that you a sinner
Got this pendant round my neck
And my chain is made of silver
Everyone watching what I say
Well bitch I know I have no filter
When I ask you for your help
I know that you won't deliver
Every time I come around
I know that I'm not familiar
If my brother moving standard
Body cold just like a swimmer
I got racks inside my face
This shit gonna shine just like some glitter
You won't say it to they face
You like talking over Twitter

When I think about you
All I do is quiver
I've been worrying about my family and my sister
You wanna take my life
Then go head pull the trigger
Every day see different faces in the mirror

On your lips, still cigarettes
Heart is beating out my chest
And my name stay on your tongue
Talk to me like you're obsessed
Tryna show me I ain't new
Cause you think that I'm impressed

I'm just calling out forever
Trying to plug out my distress
On your lips, still cigarettes
Heart is beating out my chest
And my name stay on your tongue
Talk to me like you're obsessed
Tryna show me I ain't new
Cause you think that I'm impressed
I'm just calling out forever
Trying to plug out my distress

And I burn inside my soul
You pull me apart to make me whole
And I'm trying to gain my self control
And when I'm alone will you console
Thoughts gon' go to my brain and overflow
? you know
I'm over the edge and I'm gon' break
And every time that you mention her I'm gonna hate
I be overthinking shit feel like I made a mistake
And if I tell you I need time
I know you don't want to wait
And I be praying for some help
But now I'm losing my faith
And I can't keep running in circles
Know I'm too hard to chase

If I express my feelings now then I know that I'm too late
Everything that happens to me never going my way
I know every step I make is one step closer to fate
Your intentions were to love me now they've turned into hate

On your lips, still cigarettes
Heart is beating out my chest
And my name stay on your tongue
Shouts out me like yo what's up
Tryna show me I ain't new
Cause you think that I'm impressed
I'm just calling out forever
Trying to plug out my distress
On your lips, still cigarettes
Heart is beating out my chest
And my name stay on your tongue
Shouts out me like yo what's up
Tryna show me I ain't new
Cause you think that I'm impressed
I'm just calling out forever
Trying to plug out my distress
