

## Waist Deep In Cold Water

ericdoa

Take note of situations  
I know just who you are  
Mind filled with trepidation  
You think that's so bizarre  
You try your best to fix it, I know that I'm wrong  
I tell you everything is stable and my bodies feeling strong  
But it's not

You out of my way but I can not  
Find a way to change the things I do

Waist deep in cold water I try my hardest to stand  
Falling on my knees wasn't planned  
Get anything you want  
Your wish is my command  
For me to die  
Take me to the holy land with you  
And I'm sorry I don't care what you've been through
