

Too Young To Know

Erik Hassle

Hear the sound of the school bell, we take off
To go all the way
Leaving ground with your hand in my hand, we smile
Through the pouring rain

Yeah we were ready to go
Where the young people go
When they know they're about to grow up
To the sound of church bells angels sing
Too perfect beat
We sneak up the stairs and you close the door
This is what been waiting for

Too young to know
Is it love we're making
Dying to know
Your body can't let go
Is it love we're making
Too young to know
Your body

On the floor in silence, out of words
And your trembling arms
Guessed we crossed every border over and out
On the other side

Yeah we were ready to go
Where the young people go
When they know they're about to grow up
Yes we made it together forever's here
In your trembling arms
We sneak up the back door and meet the world
There's no way back to what we were

Too young to know
Is it love we're making
Dying to know
Your body can't let go
Is it love we're making
Too young to know
Your body
We sneak up the stairs and you close the door
This is what been waiting for

Too young to know
Is it love we're making
Dying to know
Your body can't let go
Is it love we're making
Too young to know
Your body
