

Good Time

Erika De Casier

I had a really good time
I had a really, really, really, really, really good time
Good time with you
I had a really good time
I had a really, really, really, really, really good time
Good time with you
I had a really good time (Uh-huh)
I had a really, really, really, really, really good...
Ha-ha

It's so beautiful tonight
The moon is up and we feel fine
Love feels almost real
And when you realize that you put your phone down
And seem surprised to see me look you in the eye

Don't write it in a message
Just say it to my face
And try hard like you mean it
I wanna hear you say my name
Don't write it in a message
Just say it to my face
'Cause we don't live forever
Better recognize real things

I'm tryna have a good time with you
I had a really good time
I had a really, really, really, really, really good time
I'm tryna have a good time with you
I had a really good time (Uh)
I had a really, really, really, really, really good time

The blue light from your phone
Lights your face up in the room
And you don't even know
I'm out here tryna get to know you
You're always online (Always online)
You're never 'bout mine (You're never 'bout mine)
Yo, baby, I'm trying to know what's on your mind

Don't write it in a message
Just say it to my face
And try hard like you mean it
I wanna hear you say my name (Say my name)
Don't write it in a message
Just say it to my face
'Cause we don't live forever
Better recognize real things

I'm tryna have a good time with you
I had a really good time
I had a really, really, really, really, really good time
I'm tryna have a good time with you
I had a really good time
I had a really, really, really, really, really good time

Spend time, spend a little hour with me

I assure you there's a lot of things to see
We could talk or we could walk a little
We could be like real people, like, do real things
You always gotta be available to everyone you know
I wanna know what's inside, but I really don't know

Don't write it in a message
Just say it to my face
And try hard like you mean it
I wanna hear you say my name
Don't write it in a message
Just say it to my face
'Cause we don't live forever
Better recognize real things

I'm tryna have a good time with you
I had a really good time
I had a really, really, really, really, really good time
I'm tryna have a good time with you
I had a really good time
I had a really, really, really, really, really good time
