

Summertime Flies

ERNEST

Shotgun-ridin' with the windows down
Eighty-five days in a cornfield town
Blond hair singing to the radio
Baby never looked so good

I wish these days could last a little longer
But as soon as all these feelings go get stronger
It's like my how

Summertime flies
When you got a sweet thing right beside ya
Funny how you fall then fall will find ya
Sayin' goodbye to a girl you need
Got too lost in her deep blue eyes
Way too easy to start that fire
Every time we get there we get higher
And then she's gone and stuck on your mind, like right now
My how summertime flies

Moon goin' down on our last night
Hood of my truck, got me wrapped up tight
Kissin' that whiskey off your lips
Oh baby never felt this good

I wish that we could stay a little longer
But as soon as all these feelings go and get stronger
It's like my how

Summertime flies
When you got a sweet thing right beside ya
Funny how you fall then fall will find ya
Sayin' goodbye to a girl you need
Got too lost in her deep blue eyes
Way too easy to start that fire
Every time we get there we get higher
And then she's gone and stuck on your mind, like right now
My how summertime flies

Summertime flies
When you got a sweet thing right beside ya
Funny how you fall then fall will find ya
Sayin' goodbye to a girl you need
Got too lost in her deep blue eyes
Way too easy to start that fire
Every time we get there we get higher
And then she's gone and stuck on your mind, like right now
My how summertime flies

How summertime flies
It just passes by you
Keeps you wondering why
My how summertime flies
How summertime flies
It just passes by you
Keeps you wondering why
My how summertime flies
