

Leave A Light (I'll Keep A Light In My Window)

Eruption

Leave a light, leave a light
In my window
Leave a light, leave a light
In my window
Leave a light, leave a light
In my window
Leave a light, leave a light
In my window

Someone's friendless and cannot find their way
So I'll keep a light in my window
I want to be there to help restore their faith
So I'll keep a light in my window
If it wasn't for God's mercy, I'd be in their place
So I'll keep a light in my window

So I can ease the pain that life can bring
Help you find the peace your spirit needs
I have been sure in my heart that what you need
Is to give the world a love for me and you

Leave a light, leave a light
In my window
Leave a light, leave a light
In my window
Leave a light, leave a light
In my window
Leave a light, leave a light
In my window

Some call me foolish to lend my helping hand
But I'll keep a light in my window
I feel so good when I help my fellow man
I'll keep a light in my window
And until love and mercy are shared throughout the land
I'm gonna keep a light in my window

So I can ease the pain that life can bring
Help you find the peace your spirit needs
I have been sure in my heart that what you need
Is to give the world a love for me and you

Leave a light, leave a light
In my window
Leave a light, leave a light
In my window
Leave a light, leave a light
In my window
Leave a light, leave a light
In my window

Leave a light, leave a light
In my window
Leave a light, leave a light
In my window
Leave a light, leave a light
In my window

Leave a light, leave a light
In my window

Darkness falls harder than it ever fell before
I'll keep a light in my window
People are hoping that they'll find an open door
I'll keep a light in my window
And until love and mercy shines throughout the land
I'm gonna keep a light in my window

So I can ease the pain that life can bring
Help you find the peace your spirit needs
I have been sure in my heart that what you need
Is to give the world a love for you and me, hey

Leave a light, leave a light, leave a light
(Oh, leave a little, little, little light for me, uh-huh)
Leave a light, leave a light
(Oh, just a little light)
