

Let Me Be

Escape the Fate

Let me be your first time
Let me be your last
Celebrate your highs
And lift you when you crash
The only name you breathe
Let me be, let me be

Let me be a slow song
Let me be a fast
The thought rolling off your tongue
Your pocket full of cash
The dream when you sleep
Let me be, let me be

The night you won't forget
The words you don't regret
Your one and only
Let me be, let me be

Your make a wish that comes true
The one you always run to
Your one and only
Let me be, let me be

Let me the secret
You spill in the dark
That puts you back together
When you fall apart
The heart on your sleeve
Let me be, let me be

Your balance
When you walk along the edge
The out from under
When you're in over your head
The reason you believe
Let me be, let me be

The night you won't forget
The words you don't regret
Your one and only
Let me be, let me be

Your make a wish that comes true
The one you always run to
Your one and only
Let me be, let me be

I gave you pests
Not butterflies
I know
You suffer through my lies
You're still the only one for me
Let me be, let me be

Let me be your first time
Let me be your last

Celebrate your highs
And lift you when you crash
The reason you believe

The night you won't forget
The words you don't regret
Your one and only
Let me be, let me be

Your make a wish that comes true
The one you always run to
Your one and only
Let me be, let me be

The night you won't forget
The words you don't regret
Your one and only
Let me be, let me be
