

Suspended Animation

Esham

Suspended animation, bringin' back the dead
Hypothermia, frozen voices in my head
I know that's some shit, like a thousand times I've said
But I don't give a fuck, you an uncautious traveler
I'm the mind unraveler, comin' through shootin' space invaders
like Galaga
Suspended animation is the slowin' of life processes by external means without termination
Breathin', heartbeat, and other involuntary functions may still occur, but it's like human hibernation
Freezin' organisms usin' liquid nitrogen
I'm dead, don't cremate me, reanimate me
Make me stronger, faster, bionic cryonics
There's a risk of tissue and brain damage, but still I'll manage and make the planet panic
Suspended animation, chemically induced
I've been on a killin' spree since I been introduced
He's a frozen baby out the freezer
Old English D hat covers up my Caesar
I see Jesus

Lyin' in my sensory deprivation chamber
Deep meditation relieves all anger
Filled up with water and salt, I don't sink
Higher level of consciousness, I don't think
Open up my seven chakras, then I'll rock ya
Life's a bitch accordin' to the witch doctor
I traveled through space and time in my own mind
At the speed of light, no sight, your third eye blind
Suspended animation, character defamation
I don't even know where I'm gettin' this information
Sensory overload, chemical overdose
Spit this wicked scripture, you'll be catchin' the holy ghost
Suspended animation, I can make time stop
Through the cosmos, cosmic waves, cosmic slop
I'm out your mind, an out-of-body experience
They say I'm too serious, it makes me delirious
I'm movin' these pieces through telekinesis
Your thoughts become reality when put in a [?]
So do you believe this? It's Satan or Jesus
My rifle of the holy bible say you should read this
Some say they don't need this
Spit wicked shit and they bleed this
Blood comin' out of they ears since KKKill the Fetus
Suspended animation, follow the leader
