

# Parasite

Electric Callboy

I can feel it taking over all my senses  
Getting slower  
And every part of your dead mind is me  
But you're gonna be the one too blind to see

I cannot take it  
You started taking me in  
I cannot take it  
You wanna bury me, bury me  
I would rip you off like a Band-Aid on my knee  
But you hold on tight, you're a part of me

We struggled all the way  
And it was still okay  
But I lost it when you got into my head  
You and me forever  
You're like a parasite  
But you keep me alive  
And I can hear you say  
"We're gonna be okay"  
I know you're lying but the truth is what I fear  
You and me forever  
You're like a parasite  
I really need you to stay

I can feel it taking over  
all my senses getting slower  
And all you see is an illusion of truth  
It will make you believe you got nothing to lose

You cannot take it  
I'm crawling under your skin  
You cannot take it  
You gotta carry me, carry me  
I will make you mine  
You can run but you can't hide  
And I will push you down  
You better give in to me

We struggled all the way  
And it was still okay  
But I lost it when you got into my head  
You and me forever  
You're like a parasite  
But you keep me alive  
And I can hear you say  
"We're gonna be okay"  
I know you're lying but the truth is what I fear  
You and me forever  
You're like a parasite  
I really need you to stay

I can feel it taking over all my senses  
Getting slower  
I see you fighting but I'm letting you know  
I don't lurk in the dark but  
I'm already here with you

And I'll never say goodbye  
'Cause I'm feeding on your  
Sadness, your nightmares, your dirty little soul  
Your pain is my pleasure  
You feel me everywhere you go

There's no way to hide  
I will find you  
And every time that you think I'm not with you  
I will push you into deep  
You are dead but alive

We struggled all the way  
And it was still okay  
But I lost it when you got into my head  
You and me forever  
You're like a parasite  
But you keep me alive  
And I can hear you say  
"We're gonna be okay"  
I know you're lying but the truth is what I fear  
You and me forever  
You're like a parasite  
I really need you to stay
