

# Ruins

Esmée Denters

We were living like Greek Gods under the sun  
Who would have thought that one day our kingdom would fall  
Use to thrive together, but we've drifted apart  
Now, nothing grows here anymore and paradise is lost

Guess this is what they mean when they say all good things have  
to end  
I don't wanna be sad it's over, so maybe we could just be friends  
It's so easy to hate you after all that we've been through  
But I wouldn't be me without you

Just cause we're in ruins doesn't mean we're ruined  
It's just not how we thought it would be  
Think of all the good times back when you we're still mine  
Nothing's gonna change our history  
Let love be our legacy

We don't want the same things, we both have our own dreams  
Travelling down different roads, I hope you find what you need

I'm so tired of crying, cause we let each other down  
On the other side of the horizon there's another treasure to be  
found  
And it's so easy to hate you after all that we've been through  
But I wouldn't be me without you

Just cause we're in ruins doesn't mean we're ruined  
It's just not how we thought it would be  
Think of all the good times back when you we're still mine  
Nothing's gonna change our history  
Let love be our legacy...

Ooh, nothings ever set in stone  
Things happen for reasons unknown  
Let's not focus on the negatives  
It was good while it lasted  
After all this time we still got love for each other

Cause we're in ruins doesn't mean we're ruined  
It's just not how we thought it would be  
Think of all the good times back when you we're still mine  
Nothing's gonna change our history  
Let love be our legacy

Let love be our legacy  
Let love be our legacy
