

Get It By Now

Esperanza Spalding

É meu chegou
Before starting again I was there
Gon' do, 'cause y'all don't get it by now
You really getting much of me rating, rating

(I know what it means right when it's gone) and I was gone
But no one told me around, and now you'll leave, I know
You won't get it by here
You're not gonna find me no name
And everybody gets it now, in many see you, baby

And you become what you've been talking about
Take 'em back and on time
Give it in the middle of the night
Your dream don't tell you, for sure
Or gave a little hint of it all
Take him 'til you can find
The end of the tape or the road
You wanna get up when knocked down
And take it to the second hall out
Came to mine, it won't be
Dark all the knots are tight with all

You make up what you don't know
And left the rest follow my whiny call
(Nothing's what it seems) and I was some
Before I brought it on down, nobody knew them
