

I Do

Esperanza Spalding

My heady heart needs space and patience
Cleverness too
Give me some time
My heart's already bowing to you
That brightness in you, see
I fear will consume me

I try to command the light laws of the universe
Though I know that darling
I love you
I do

My heady heart is always thinking
Time is the truth
While the star in my heart is
Already shining for you
Calling light to collide
Giant and merging

I know I can't control
The laws of the universe
All I know is darling
I love you
I love you
It's simple
I do
