

Flight Path

E^ST

Took me to meet your mother
I know your favorite color
You know what I've been listening to
Everything was music around you

We spent our days by the seaside
You only saw me in good light
We spent our nights by the seashore
Now I don't know where you sleep anymore
We both lived under the flight path
Watching the people fly past, but
Then you moved away
And now I watch the planes

By myself, by myself, by myself again
By myself, by myself, by myself again

We spent our days by the seaside
You only saw me in good light
We spent our nights by the seashore
Now I don't know where you sleep anymore
We both lived under the flight path
Watching the people fly past, but
Then you moved away
And now I watch the planes

By myself, by myself, by myself again
By myself, by myself, by myself again

(One, two, three, four)

By myself, by myself, by myself again
By myself, by myself, by myself again

We both lived under the flight path
Watching the people fly past, but
Then you moved away
And now I watch the planes
By myself
